

Duette® Shades

The Ultimate Guide

Luxaflex®

The Art of Window Styling

The ultimate guide to Duette® Shades

Duette® Shades and nature work hand in hand. As well as enhancing and managing the captivating qualities of light, the Duette® Shades range is designed to support a more sustainable home and protect our environment. Technically advanced and made to measure with precision and care, our vast range of colours and finishes also brings a sleek beauty to every space. Duette® Shades are the perfect window solution combining energy efficiency and style.

Quality & innovation

We may use cutting edge techniques to manufacture Duette® Shades, but our values are distinctly old fashioned. Each of our blinds is made to measure to your exact requirements, and we take our time helping you choose from hundreds of fabrics, finishes and colours. It's this blend of attention to detail and quality materials that keep your Luxaflex® Duette® Shades operating seamlessly for many years.

Looks good...

A slimline look with both classic and trend colours, Duette® Shades have always been a popular choice for those who love to bring design home. Our latest, expanded range has even more choices to create an individual look that suits your personal style.

Future perfect

Our new Duette® Shades collection has a wide range of beautiful fabrics in playful patterns and colours like our new Batiste Crushing design that creates a perfect focal point for a room. Or choose a subtle texture and natural look with our new Bamboo design that blends with any décor style with a subtle sophisticated look.

Fresh new looks

Whatever your style our range of fabric designs will help you control light beautifully with a choice of transparency and privacy options to suit every individual room in your home. Plus, the compact design of Duette® Shades can fit almost every type of window and shape from the smallest window to large glass sliding doors.

Our new collection has lots of unique printed design options with fresh new looks like the “Ombre” design with a soft white colour at the top that gradually morphs to a soft green tone. You can play with designs and plain colours by combining them in one room for a super stylish look.

All in the details

For a seamless look, we offer six hardware colours to compliment your chosen Duette® fabrics. We match these for you, but you can also choose another shade if you want a bespoke look.

It's what's on the outside

We want to flatter our homes from all angles. Choose a plain white uniform backing for your Duette® Shades (regardless of their interior colour) with our Duette® Duo Tone style. Or if you want to be bolder with your exterior view, then choose Duette® Full Tone, where the same colour hue features both back and front of the blind.

Duette® Shades 25mm suits a small or medium window and doors.

Duette® Shades 32mm is ideal for medium to large frames.

Pleats to please

Any skilled designer knows that getting proportions right in a room are key to a successful décor scheme and that's why our Duette® Shades come in a variety of pleat widths to compliment your home.

Duette® Shades 64mm works best to balance a very large window or sliding door.

Feels good

Energy efficiency has always been core to Duette® Shades success, and we are proud to say our latest range has an even better level of insulation, with some fabrics in the range achieving an outstanding A++ rating. Even with double glazing, a building can lose up to 50% of its heat through windows and doors. By choosing Duette® Shades you can insulate your home all year round and keep warmer in winter and cooler in the summer.

Our most energy efficient design

Duette® Architella® Shades, are constructed with a unique cell-in-cell design, that can reduce the thermal gain from the sun into a room, reducing the need for artificial cooling and reduce energy usage and emissions. As the temperature drops, the honeycomb effect keeps the warmth in the room, reducing heating costs by up to 46%; better for the pocket and the planet. Our Duette® Architella® Shades are available in both 32mm and 64mm sizes.

...Sounds good

A successful room design can soothe the senses in invisible ways. Windows and hard floors can make a room seem cold or noisy, as sound bounces off the hard surfaces. Duette® Shades can help keep internal noise at bay and reduce the effect of ambient noise from hard surfaces within the home by up to 60%.

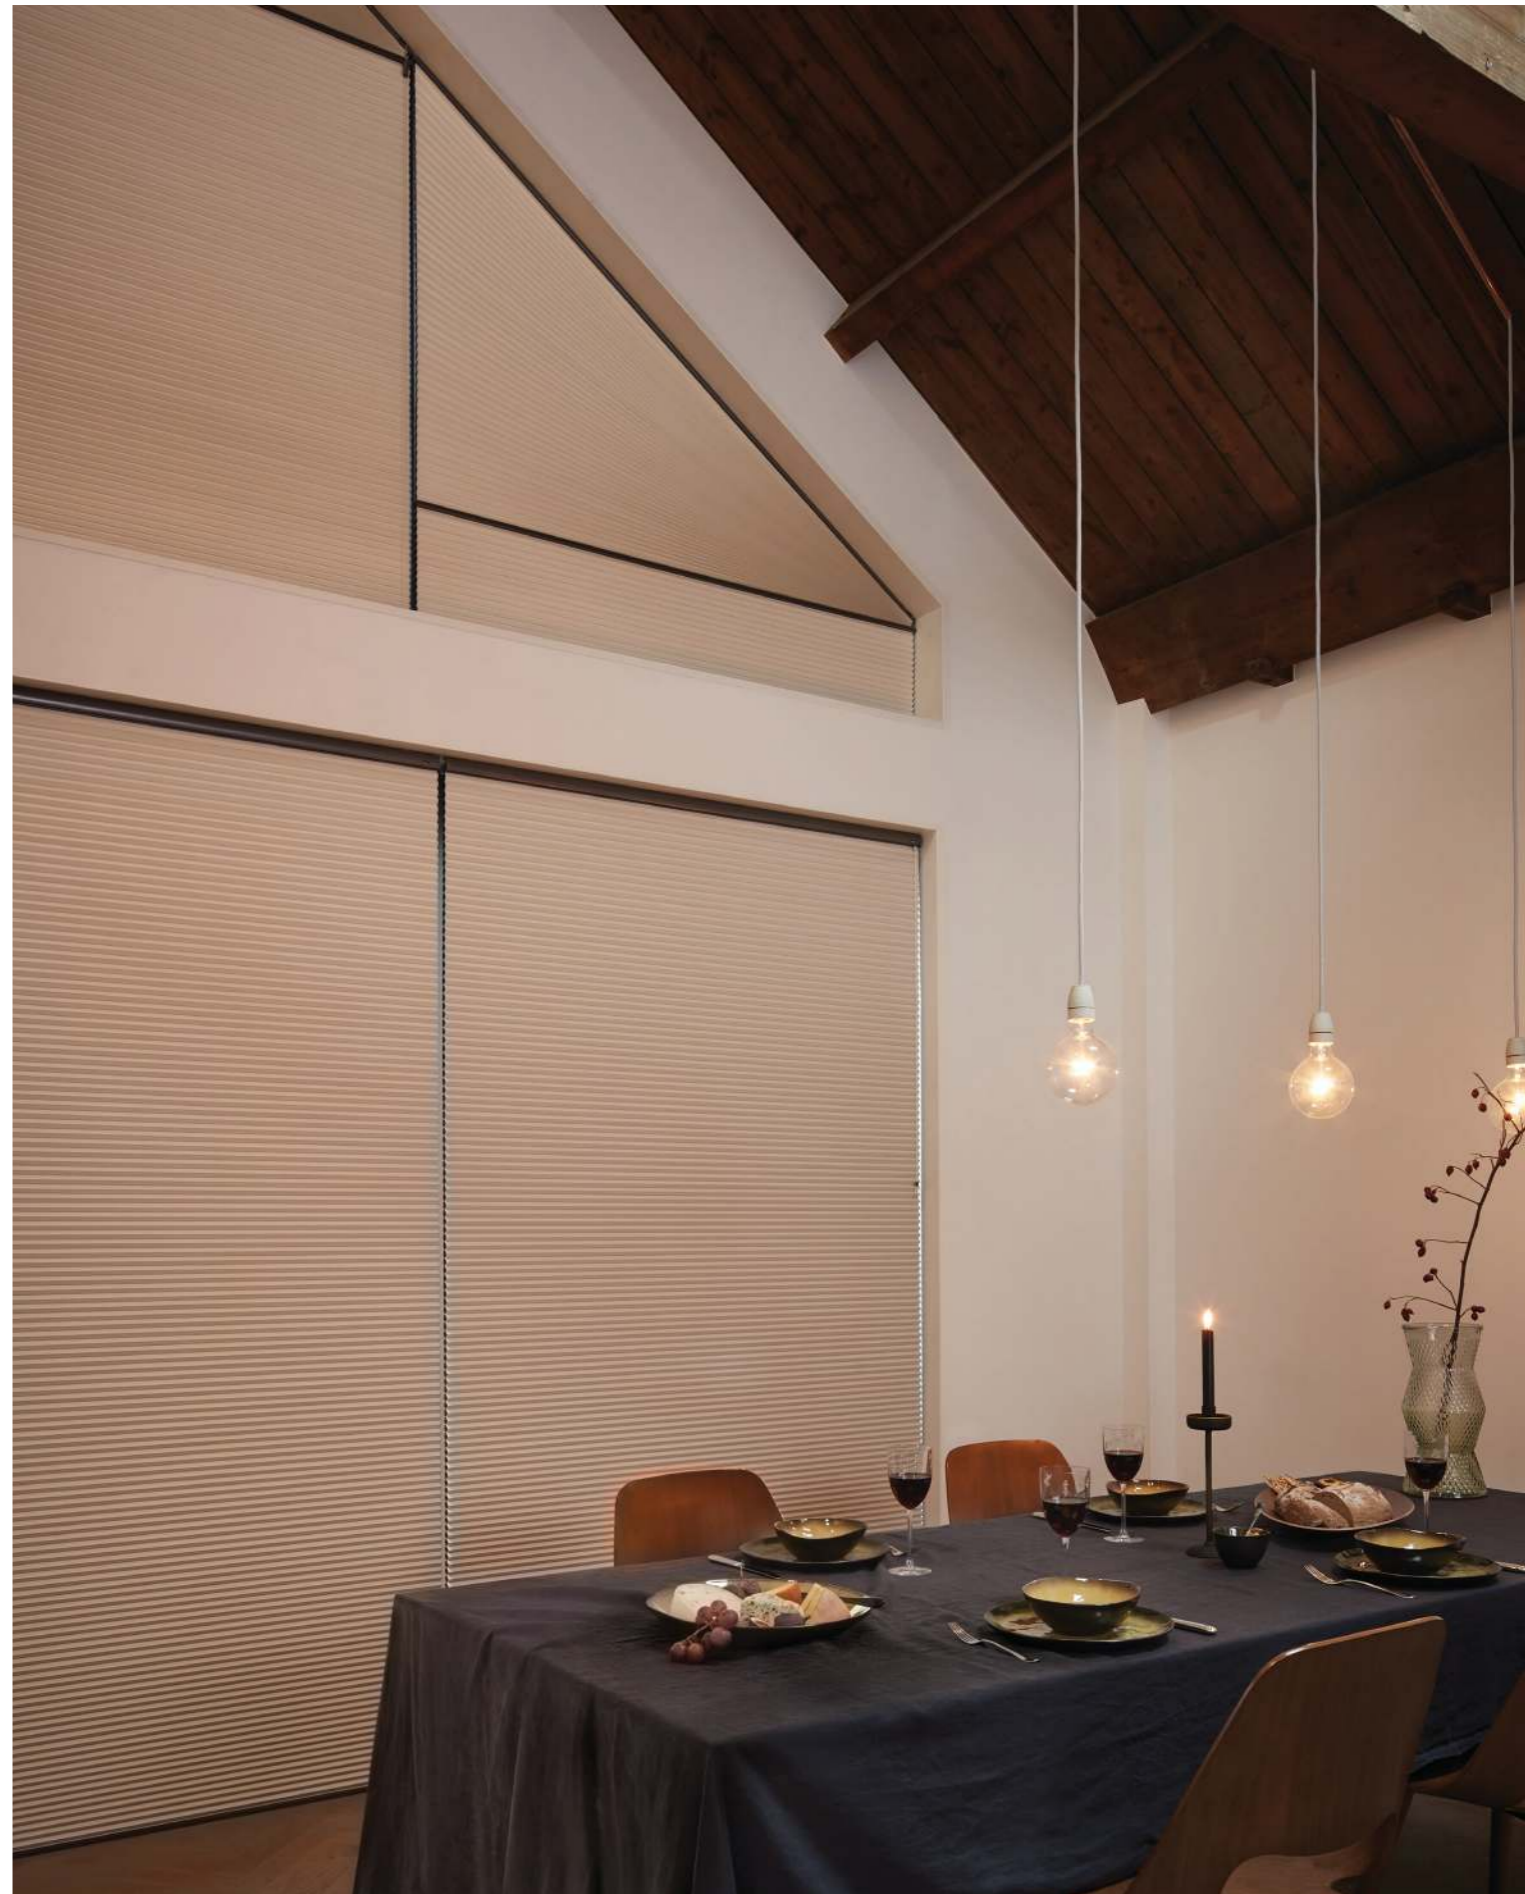

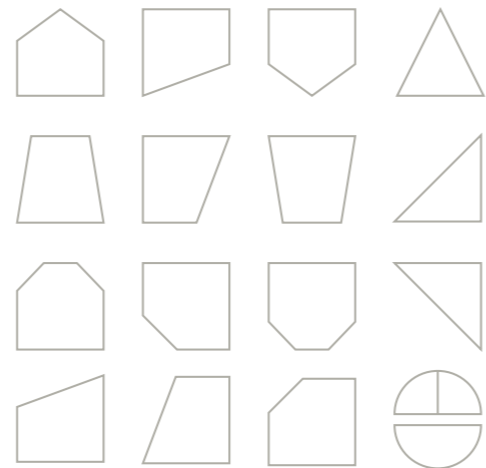

...Does good

Duette® Shades help make homes more energy efficient but we also want our products to make you feel comfortable and give you peace of mind. That's why we're committed to designing products with sustainable methods and materials. Our new Duette® Eternity fabrics are made with 40% recycled polyester material, and our new Bamboo fabric range incorporates 25% natural bamboo fibres from sustainable plantations.

More solutions for how you live

Our most flexible solution, we pride ourselves on the versatility of Duette® Shades, offering many ways to create novel looks and problem-solving combinations. From unusual shaped windows to extra small or extra high large or wide windows and sliding doors, our design team create innovative solutions for practical problems.

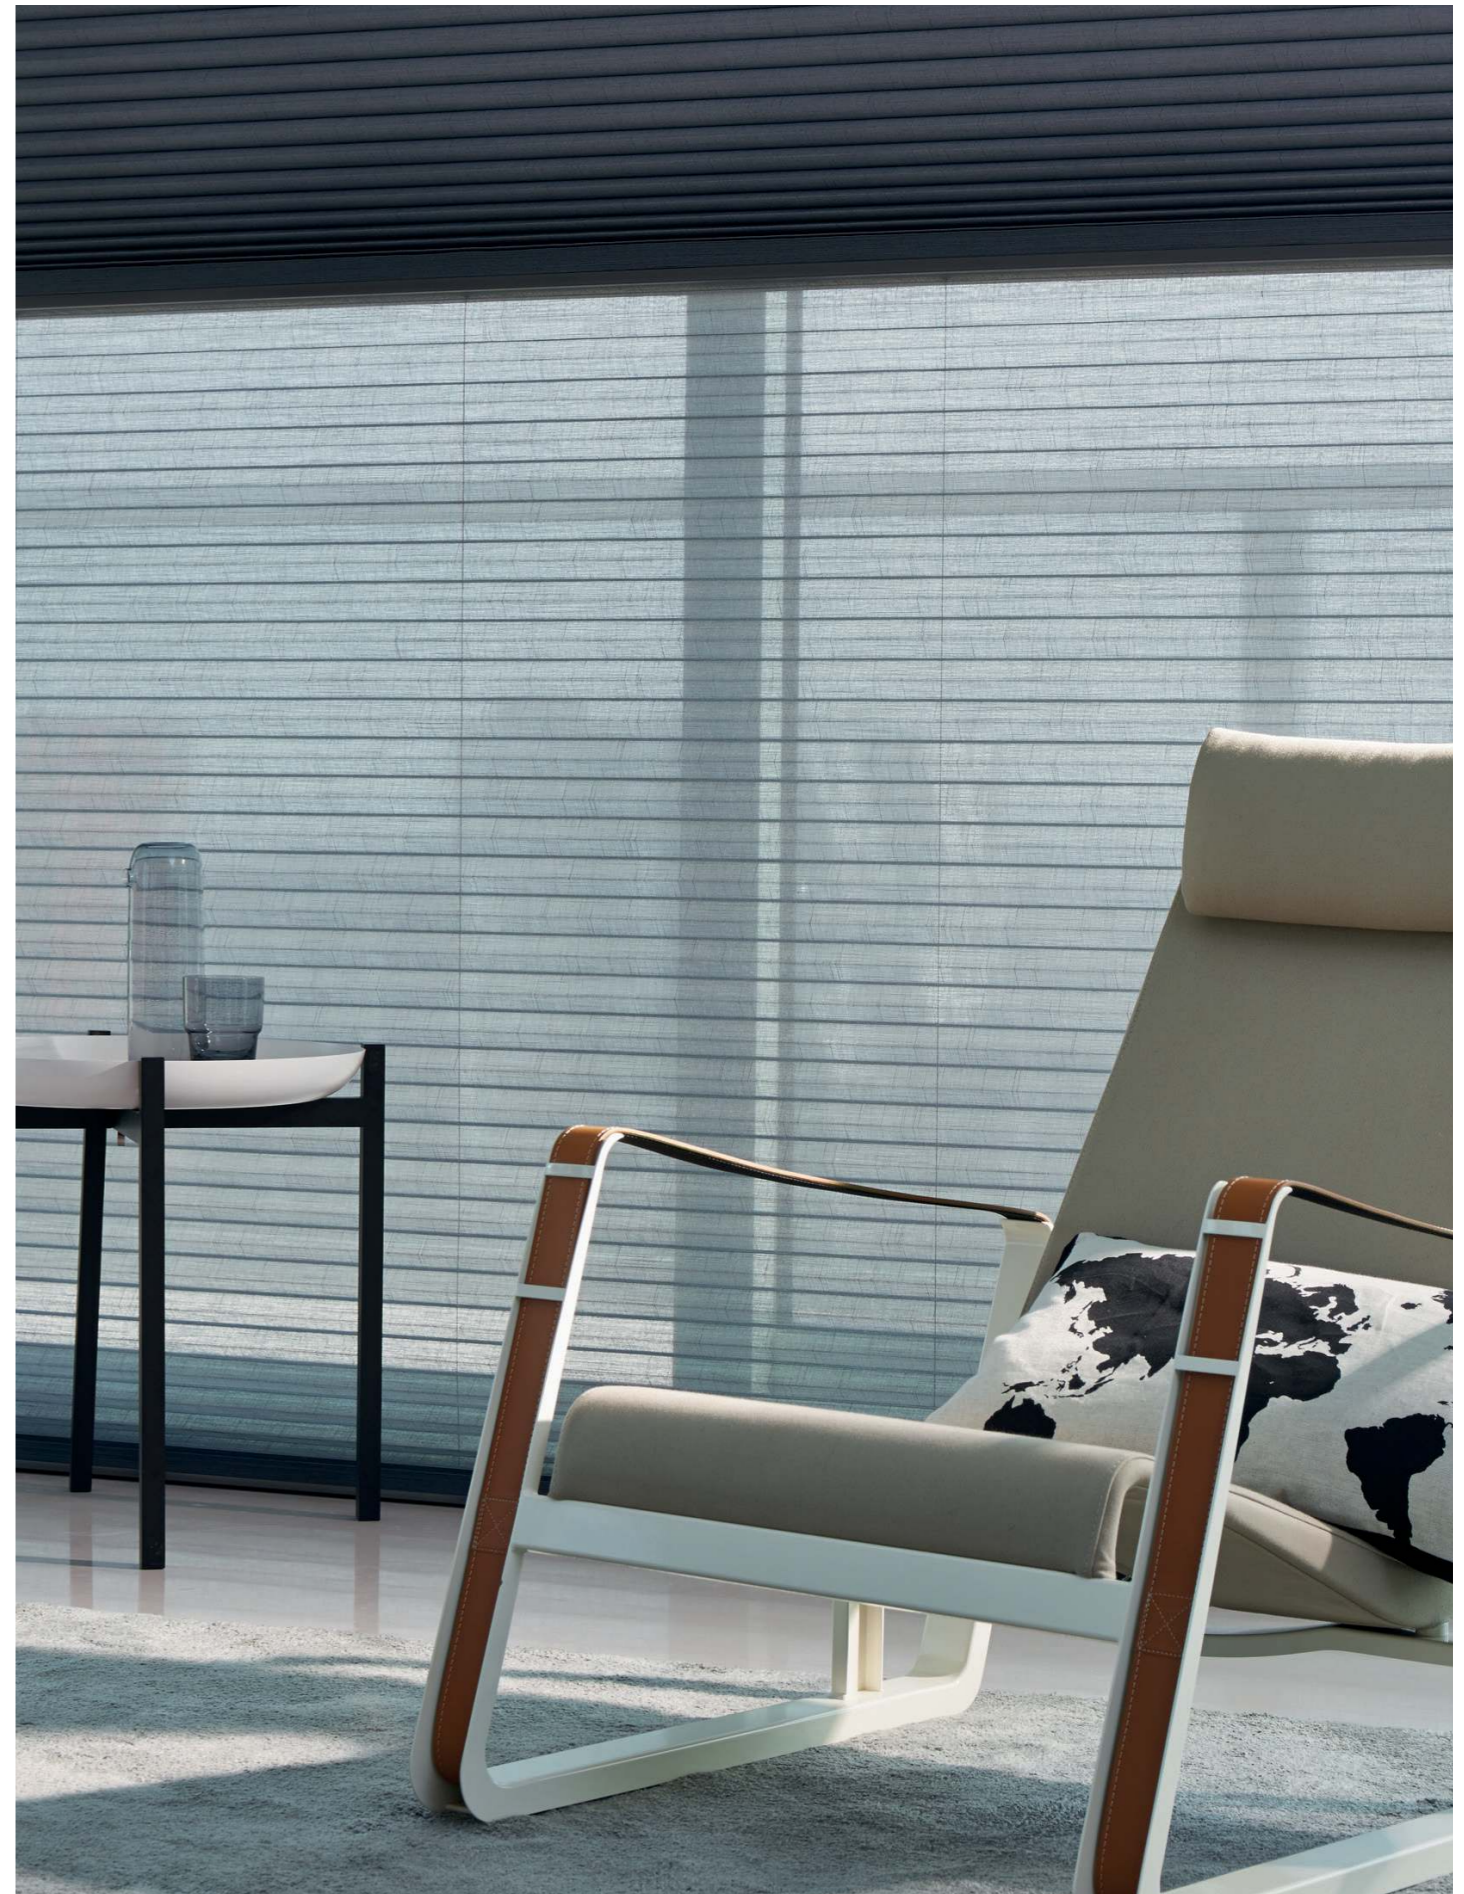

Every home is different

We understand every home has its unique quirks. That's why we offer a wide variety of solutions that can work in many unusual configurations with flexible light control.

Every day is different: day & night

Duette® Day and Night shades are designed to give you exactly what you need for a good night's sleep, privacy and a sense of security – all balanced with the enjoyment of natural light. Combine a sheer fabric and room darkening fabric in a design or plain colour – the choice is yours.

No drilling required

An idea so simple yet effective, the TruFit® system enables Duette® Shades to be fitted to glass without drilling, making it an ideal solution for doors, UPV windows and conservatories.

Consistency is key

Your transparency needs may vary across even one room, that's why we offer three grades, from transparent, translucent and room darkening all available in the same hue, so your Duette® Shades keep a coherent look in any combination of transparency.

Transparent

Translucent

Room Darkening (RD)

Take control

At Luxaflex®, we consider child safety a top priority, leading the field in making your homes safer for children and pets. Creating child safe products is an integral part of our design philosophy.

From cordless alternatives to fully motorised systems, Luxaflex® offers many innovative lifting systems designed with safety, comfort and beauty in mind. We take time to think about how we can enhance your home. A big part of that is making your daily life worry free with a range of solutions for you to consider.

PowerView[®] Motorisation

Leading the smart home revolution for window coverings, our PowerView[®] system can be operated using the app on your smartphone or tablet or using our tactile Pebble[®] remote control. Your blinds can also be programmed to wake you gently in the morning with sunrise or create a cosy retreat as you return home.

SmartCord®

Another market innovation, this system uses a retractable cord that erases the need for dangling cords to clutter the look and tempt little fingers or curious pets.

LiteRise®

A minimalist's dream, our cord free LiteRise® is operated simply by pushing the bottom bar up and down. Fuss free, clean lined simplicity.

From start to perfect finish

We want you to enjoy more than just your Luxaflex® window coverings; we want you to enjoy the whole process from initial design consultation to 'done'. From selecting materials to expert measurement and installation, experts at your local Luxaflex® showroom are here to help you create the perfect window treatments for your home.

Let's talk

Together with our local expert, you can look at inspiration for your room and get to know the products and materials you like.

Home consultation

We'll measure your dimensions, assess your lighting, and make sure everything is perfectly designed for your home.
