

# PowerView® Compatibility

## Home Automation

Whether you are a home automation enthusiast or just getting started with connected devices, you can create a personalized whole-home connected experience by integrating PowerView® Automation with compatible smart home systems.

The PowerView® Gateway integrates PowerView® features with some of the most popular systems on the market. Each home automation control system has a unique path to integration. Reference the specific usage guidelines and requirements below to integrate PowerView® with compatible home automation systems.

We support the following:
