

Luxaflex® External Solar Shading Guides

Programing an IO motor to a remote

Step 1. Press up & down together on the remote handset
Awning will shunt (move forwards and back)

Step 2. Press top button (Awning will move in/closed)
(if the awning moves out/opens press and hold the 'MY' button on the remote handset -
Awning will shunt)

Step 3. With the Awning closed - press and hold the down button on the remote - The Awning will move out/opens - after about 2 seconds release the button on the remote.

Awning will continue moving

When the Awning is fully extended - i.e. slight crack of arm the knuckle

Step 4. Press 'MY' and Up button together - (press and release the buttons, once the Awning starts to move in)

Awning will start to close..... when the Awning is about halfway closed

Step 5. Press 'MY' button.

Step 6. Press 'MY' button again until the Awning shunts.

Step 7. Turn the remote handset over and press and hold the program button until the Awning shunts.

Now the Awning is programmed
